Technical Data
Electrical Storage Heaters

Standard Serie Storage Heaters
WSP 2010 to WSP 7010
- Modern, attractive design, housing colour white (RAL 9010)
- Maximum safety thanks to additional safety temperature limiter
- High-quality thermal insulation and core-stone material
- New appliance technology with high heat retention
- Lint filter as standard fitting
- Mechanical charge controller
- Rapid mounting with factory-installed heating elements

Flat Serie Storage Heater
WSP 1210 F to WSP 4810 F
- Storage heater with slimline profile, with only 21.8 cm wall spacing
- Modern, attractive design, housing colour pure white (RAL 9010)
- Maximum safety thanks to additional safety temperature limiter
- Universal electronic charge controller AC and DC
- New appliance technology with high heat retention
- Rapid mounting with factory-installed heating elements
- Lint filter as standard fitting

Shematic diagram Flat Serie
1. Modern, attractive design, sheet steel housing, white stove enamelled (RAL 9010)
2. Control elements with clear layout
3. Front panel with high-quality Microtherm insulation
4. Extruded profile air-output grille
5. Air-intake grille with lint filter
6. Storage core with high heat retention
7. Air guidance in storage core for uniform heat distribution
8. High-quality stainless steel heating element, already installed
9. Supplementary heating element (optional accessory)
10. Bimetallic strip for air mixing
11. Safety temperature control, high safety standard
12. Tangential fan for extremely quiet operation and uniform draught-free air distribution thanks to AEG’s Silent Air-Flow system
13. Swivel terminal, easy to install
14. Electronic charge controller with high precision, universal connection (only for F and N)
15. Environmentally friendly hard-shell thermal insulation

WSP 3010
WSP 2410 F
Low Serie Storage Heater
WSP 3510 H and WSP 5010 H
- Very low-profile storage heater, only 49 cm high
- Modern, attractive design, housing colour white (RAL 9010)
- Maximum safety thanks to additional safety temperature limiter
- Universal electronic charge controller for AC and DC
- New appliance technology with high heat retention
- Rapid mounting with factory-installed heating elements
- Lint filter as standard fitting

Storage Heater with Static Discharge
WSP 1510 S
- Storage heater without adjustable discharge for tempering
- Modern, attractive design, housing colour white (RAL 9010)
- Universal electronic charge controller for AC and DC
- Rapid mounting with factory-installed heating elements

High Line Storage Heater
WSP 600 HF
- High heat output in a small floor space – only 66.5 cm wide
- Rapid mounting with factory-installed heating elements
- Mechanical charge controller
- Countersunk control knobs
- Output 6 kW
- Supplementary heating element easy to install (optional accessory)
- Housing colour: white RAL 9010

Kitchen Storage Heater WSP 300 H
- Storage heater for modern fitted kitchens
- Only 45 cm wide to fit standard kitchen module size
- Can be integrated into any fitted kitchen and matched to the furnishings
- Suitable for 10 to 14 m² kitchens
- Room-temperature controller with back-up heating switch and ON/OFF mains switch
- With counter control knobs
- With fittings (optional accessories) for freestanding installation or integration into fitted kitchens
- Supplement heating element can be readily installed (optional accessory)
- Output 3 kW
- Electronic charge controller
- Colour: white

* The appliance output should be chosen according to the calculated heating requirement and the nominal charging time and additional charging time specified by EVU.

Charge control for Storage Heaters

**ELFAMATIC μC 3000**
- Meets all EVU specifications
- Large illuminated LC display with 4 control buttons
- Automatic time synchronisation
- Comfortable setting thanks to stored charging models
- Compatible with all weather sensors
- Simple operating point adjustment ± 4 K by user

**ELFAMATIC V 3000**
- All-electronic charge control for all supply areas with unidirectional control

**ELFAMATIC G 3000**
- Digital group control unit
- Individual variation of charging degree from +12% to –36% compared with value specified by central control unit
